

Low fi wireframes

layout of the contents in visual form
without color theme and graphics

Data under the tabs vary from mine to mine
Thus to maintain hierarchy the minechooser
along with the basic utility are placed bit
above the level of tabs. This also provides
space for elements to breathe.

word 'login' suffices
the function itself
no use of icon

Section I consisting the following:
- short intro on the mine chosen
- illustration for better experience
- link to video tutorials

Section II consisting of:
- gallery view of all the intermines
with short introduction
- the neighbourhood filter chosen
constraints the list of option visible
in the mine gallery

Section III displays:
- most popular queries
- queries for one topic at a time to
provide stability to the users eye

Section IV :
- provides more api info.
- idea is to make developer section
visible (viz. accessed through mine
list)
- another idea is to add the contents
of API data (from flymine) to the
developer page (of bluegenes)

Section V includes:
feedback section

footer section includes existing
footer data from bluegenes footer
and data from contact and help page
combined in minimal form
eliminating both help and contact
page altogether
